

AKASHIC RECORD LEVEL I GRACE POINTS TO BE USED WITH CONSULTATION

The grace points are found in the soft tissue of these areas of the hand. They show up in either the right or left hand. Ask the Masters, Teachers and Loved Ones, which hand to use. The following grace points can be used either **in** or **out** of the Records.

1. The Main Grace Point:

- Releases contracted energy so the information is clearly received.
- Focuses insights
- Integrates the new insights creating positive reference points.

2. Body Release Point:

- Releases unmoving, stuck energy (issues, judgments, beliefs, emotions, etc.) from the body. The flow of information is then available. The cause of pain is then identified.

3. The Genetic (Ancestry) Lineage Point:

- Releases issues, judgments, beliefs, emotions, etc., that have been passed down through the DNA or taken on through family connections.

FOUR ADVANCED GRACE POINTS

1. **Emotional Release Point** directs the consciousness to disconnect and clear the emotions surrounding what you are clearing. It is located in the pad below the small finger.
2. **Cellular Level Clearing Point** directs the consciousness to disconnect and clear all the way to the cellular level. It is located in the pad area between the two middle fingers.
3. **Ego Disconnect Point** directs the consciousness to disconnect and clears all ego positions connected to what you are clearing. It is located in the pad below the index finger.
4. **Reconnecting Original Innocence Point** directs the consciousness to move you to the position of original innocence concerning what ever it is you are clearing. It is located in the lower palm in the pad area above the wrist.

The emotions, which are energy in motion, give energy to the ego position. Our innocence is and always has been present. The intentional choice of grace allows the flow of energy for clearing and alignment. The intention of using grace directs the clearing all the way down into the cellular level. **To establish an inner reference point to peace is an on-going process of discovery in our lives.**
